Water for Injections	IP	q.s.

Contains no preservatives.

D-ORTHO-6

INTRA-ARTICULAR SODIUM HYALURONATE INJECTION SYSTEMS

INTRODUCTION

D-Ortho Injection is a medicine used in the treatment of osteoarthritis. It decreases the pain and swelling in the joints. It may be used alone or in combination with other medicines.

D-Ortho Injection is given by a healthcare professional. You should not self-administer this medicine at home. Use it regularly and do not stop taking the medicine even if you get better until that doctor tells you it is alright to stop.

The medicine is generally well tolerated with little or no side effects. It may cause pain, redness, and pain at the site of injection in some people. However, if you experience any symptoms which you think are due to the use of this medicine, you should let your doctor know. Your doctor may help with ways to reduce or prevent these symptoms.

To make sure the medicine is safe for you, let your doctor know of all the other medicines you are taking before using this medicine. If you are pregnant or breast feeding, you should consult your doctor first before taking this medicine.

The principal component of **D-Ortho-6** is a naturally derived substance called hyaluronan that relieves your pain by lubricating and cushioning your knee joint. Hyaluronan is a particularly high amount in joint tissues and in the fluid that fills the joint (also called synovial fluid). **D-Ortho-6** is injected directly into the knee.

USES OF D-ORTHO INJECTION

Osteoarthritis

BENEFITS OF D-ORTHO INJECTION

In Osteoarthritis

Osteoarthritis is a condition that causes pain and stiffness in the joints. D-Ortho Injection helps relieve pain and reduces inflammation and swelling in your joints due to this condition. This will ensure that you have a better, more active, quality of life. Additionally, you may consider simple lifestyle modifications such as regular exercise, losing weight, maintaining good posture while doing various daily activities, and wearing comfortable footwear. This will help you manage mild symptoms of osteoarthritis very effectively in the long run.

SIDE EFFECTS OF D-ORTHO INJECTION

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of D-Ortho.

HOW TO USE D-ORTHO INJECTION

Your doctor or nurse will give you this medicine. Kindly do not self-administer.

HOW D-ORTHO INJECTION WORKS

D-Ortho Injection is natural polysaccharide (sugar). In bone disorders (osteoarthritis), it works by reducing friction in the joints and helps them work smoothly. D-Ortho Injection also has an antigenic effect. When injected into the skin (on the face most often), it works by hydrating the skin, enabling it to retain more water. This creates a filling/plumping effect and potentially fights wrinkles and other signs of ageing.
